

co_™issues

co_™issues, the simple but powerful project tool

- ✓ Do you want to provide your organisation a user friendly platform to manage tasks, activities and initiatives?
- ✓ Should the tool allow a flexible and dynamic approach, where is not possible to plan the entire project at start, to adapt to new situations and discoveries?
- ✓ Should the monitoring the progress be really easy and the participants and task owners notified automatically?
- ✓ Do you want to report costs, progress, product, business partner or departmental relations, time spans at any time?
- ✓ Should the exploration of any interdependencies with quality relevant content be easy?
- ✓ Should costs and benefits be traced until completion of the project or initiative?
- ✓ Should the workflow be logged to provide a solid progress information and audit trail?
- ✓ Does your organisation's size still allow a manual ad hoc approach for the number of initiatives, projects and participants?

Simple capture of activities

Does not matter originating from construction, post audit follow up, ad hoc initiatives – the modern web application co_issues manages all projects and tasks in a structured but simple way. Planning, changing, managing, monitoring and reporting become very easy.

logging engine keeps track of the project status and store all changes in the central data base. The tasks and sub tasks can be related to business partners, departments, products, locations, assets, ... to enable a flexible reporting.

Project or program manager steers the project centrally - even in a global environment. Reminders for overdue tasks or escalation alerts are managed by the application automatically. The

Facing the future mankind is confronted with a variety of demanding challenges. Adding value today requires creativity, knowledge and insights to master the problems of today and tomorrow.

With our products and services we hope to contribute to your success. C.O.S expertise in the area of information and quality management technology can help to design and set up the appropriate infrastructure in your organisation.

Notification

Tasks owners receive a notification from the system, whenever changes or updates to their responsibilities occur. They can be empowered to decide accepting, refusing or delegating their tasks according to their competency or workload to ensure a continuous throughput.

Corporate Governance:

co_issues provides your business a framework that encourages responsible leadership, clear insight and an inspiring and scalable tool to master challenges in a structured approach.

Interfaces:

All static user data and organisational master data are kept current by automated import from the Windows LDAP or Active Directory or any other HR-data source. An open architecture makes the implementation of other interfaces easy.

co_issues can import proposals or audit findings from the respective modules co_ideas or co_audits to allow a joint monitoring during the implementation phase.
