Projects structures the work of your project organisation?

- Gain a cross-site overview of your project portfolio.
- Allocate project resources accurately.
- Create transparency in all project phases.
- Keep track of any changes during the project.

Collaboration-Online- Projects controls your research and development processes during the run-up until the start of routine operations or production. It manages the work processes within and outside the project.

The integrated notification ensures a clear communication among the work groups, departments and external business partners. The data obtained in the project management system are combined into an integrated management dashboard.

Cutting edge

- ✓ Resource planning with MS Project.
- ✓ Manage the contents and use of the information distribution system from SharePoint.
- ✓ The customisable data layer ensures the adaptation to the particular project environment.
- ✓ Workflow Management
- ✓ Cross-project reports on various aggregation levels: project, department, controlling perspective, business, dashboard (one pager).
- ✓ Traffic lights to monitor the project status over the entire life cycle.
- ✓ Change Management module for a concise tracking and coordination of changes during the project and after start of the routine operations.
